

Summary

This course is designed for participants who are required to perform alcohol and other drug testing within their workplace or would like to join the drug and alcohol testing industry as a Certified Collector.

NATIONALLY RECOGNISED
TRAINING

Overview

The accredited 10440NAT Course in On-site Drug and Alcohol Testing comprises the ODTSCS001A Perform specimen collection and screening for on-site drug testing unit of competency. AusHealth Work is a Registered Training Organisation (RTO 40379) and participants will benefit from years of drug and alcohol testing experience. This course provides in-depth instruction in the application and practice of:

- AS 3547:1997 Breath alcohol testing devices for personal use;
- AS 4760:2006 Procedures for specimen collection and the detection and quantitation of drugs in oral fluid;
- AS/NZS 4308:2008 Procedures for specimen collection and the detection and quantitation of drugs of abuse in urine.

This course satisfies the requirements for certified persons to collect, screen, handle, store and dispatch oral fluid and urine samples to the laboratory for analytical testing.

Outcomes

On completion of this course, the participant will be expected to demonstrate their understanding in the following areas:

- On-site drug testing
- Communicating effectively in an on-site drug testing environment
- Working ethically (including privacy and confidentiality concerns) in an on-site drug testing environment
- Pre-collection
- On-site testing requirements and practice
- Post-collection
- Chain of custody requirements and practice

The course is conducted nationally by our team of expert trainers who have current industry experience in conducting drug and alcohol screening and hold the Certificate IV in Training and Assessment (TAE40110).

Further, AusHealth Work's 10440NAT Course in On-site Drug and Alcohol Testing training and education materials are endorsed for compliance and interpretation to AS/NZS 4308:2008, AS 4760:2006 and AS 3547:1997 by SAI Global, Australian distributor of the Standards.

Assessment

Competency is assessed through a combination of practical application and demonstration of skills, written assessments, case studies and role plays.

The course requires successful completion of the following:

- Participant workbook consisting of general questions that complement the presentation including completion of drug test forms.
- Practical assessments performed on the day including:
 - Performing an initial and confirmatory breath alcohol test using a breathalyser
 - Performing an oral fluid specimen collection, on-site screen and preparing the sample for dispatch to the laboratory (chain of custody)
 - Performing a urine specimen collection, on-site screen and preparing the sample for dispatch to the laboratory (chain of custody).

Course Length and Delivery

This is a one-day training course delivered throughout Australia at your workplace (subject to minimum number requirements) or you can attend one of our public courses.
